

Applied Behavior Analysis (ABA) Clinic

We Can **HELP!**

Monday – Friday

9:00 am – 1:00 pm (20 hours weekly)

For 2 – 5 years old diagnosed with Autism Spectrum Disorder

Applied Behavior Analysis (ABA) is a scientific approach to behavior management, change and understanding. Using techniques such as positive reinforcement and prompting, as well as naturalistic and incidental teaching strategies, ABA therapy can support an individual in acquiring new skills. This approach to treatment is considered a “gold standard” in the treatment of Autism Spectrum Disorder with intensive programs recommended in the early developmental period.

- This program is overseen by Board Certified Behavior Analysts
- All participants receive 1-on-1 support from trained staff
